

**AG LABORATORY**

# SOURCE TO SYNC

**COMPREHENSIVE GROWING PROGRAM**

## PLANT TISSUE

Strategic tissue analysis that monitors nutritional flow within the plant by strategically taking tissue samples.

NEW GROWTH

OLD GROWTH

## IRRIGATION ANALYSIS

To understand what salts and nutrients are being applied through the application of irrigation water

## LYSIMETER ANALYSIS

To know when the salt levels are building up in the root zone, what nutrients are readily available to the crop in real time.

## SOIL ANALYSIS

To understand what soil chemistry, biology, pH and exchangeable nutrients are potentially available to the crop.

## All in One Comprehensive Nutrient Monitoring

Infusing irrigation, soil, lysimeter, and strategic tissue analysis to bring you the most comprehensive nutrient management program in the industry.
